

Occupational/Recreational Hearing Protection

Style 4RT—\$120/pair

Designed primarily for **motorcyclists** to wear under a helmet to help eliminate wind noise, the 4RT is made in our soft vinyl material and features a hollow canal style for greatest comfort. Low profile, canal style earpieces feature a handy removal filament.

Style 40—\$120/pair

A multipurpose earpiece for any high noise environment, the style 40 is very popular with **shooting enthusiasts, heavy equipment operators, construction workers, and others.**

Style 47—\$120/pair

For hearing protection in a high noise environment where basic communication is necessary. **A Dentist would benefit from these considerably.**

Style 42—\$120/pair

Designed for low-level noise exposure, the style 42 offers filtered hearing protection. The earpieces are made with two 680 ohm filters, providing protection without being completely closed off.

Custom Earpieces

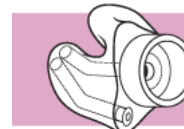

Stethoscopes (Style 28A)

This thick shell custom earpiece allows **CIC** instrument users to effectively use stethoscopes. The style 28A earpiece is placed in the external ear, over the **CIC**, with a cavity on the outside to accept standard stethoscope eartips.

Cell Phone/MP3 (Style 7) - \$120/pair

The thick shell adapts cellphone headsets and button style stereo headphones to custom earpieces.

CR1 Custom Recreational Earphone—\$225

For active individuals who love their music and want to upgrade from stock stereo earbuds. **Perfect for travel, exercise, or motorsports** (not recommended for on-road use), the CR-1 is driven by a set of high quality drivers in a pair of full shell clear custom earpieces. Compatible with virtually any personal audio devices including iPod, CD, DVD, and MP3 players, with a 50-inch hardwired black cable and 3.5mm stereo plug.

The Impression Process

Family Audiology's hearing protection products are molded from an impression taken directly from your ear. The impression process is painless and takes less than 15 minutes. Because your ears are unique, just like your fingertips, only custom-made hearing protection can provide a great fit, superior comfort and repeatable effectiveness.

Custom Ear Molds

UM56—\$150.00/pair
(\$75.00/single)

If you currently own universal in-ear monitors, you can improve the fit of your monitors with a pair of Westone style # 56 canal style custom earpieces. These are comparable in size to the tips provided with most universal-fit musicians' monitors, but ensure the comfort seal that only a custom fit product can provide.

ES49— \$150.00/pair

Extra Filters: \$75.00/pair
The ES49 is the earplug of choice for the discriminating performing musician or concert goer. The flat attenuation characteristics allow you to hear the music accurately but at a safer volume. The ES49 is a canal style earplug that is virtually unnoticeable. The ES49 comes with a standard 30 dB filter, however you have the option of either a 9, 15, or 25 dB filter which is sold separately. The ES49 is perfect for any musician or music lover.

Musician Monitors

ES1— \$375

Built to the same exacting standards as the Westone ES2, the single-driver ES1 offers Westone performance and sound at a lower price. Custom made to fit your ear, the Westone ES1 provides over 25 dB of ambient noise reduction and offers astonishing sound quality.

ES2—\$650

Custom made to provide a precise, comfortable fit, the dual driver Westone ES2 provides exceptional low frequency response, smooth mids and articulate highs. Our most popular and versatile custom monitor, the ES2 is designed for the most discriminating artists.

ES3/ES3X—\$800—850

The Westone ES3 is the world's first true three-way, custom in-ear musicians' monitor. A built-in bump in the midrange frequency response especially Benefits performing guitarists and vocalists. Providing over 25 dB of ambient noise reduction, the ES3 provides sparkling highs, clear mids and tight low-end response.

ES5—\$950

The ES5 was designed to deliver sound quality, clarity and response comparable to monitors with more drivers. With 25dB of ambient noise reduction and the long-wearing comfort only a custom earpiece can provide, the ES5 is a clear choice for the most discriminating musician looking for a high-end, well balanced custom musicians' monitor.

Swim Plugs & Hunting Earpieces

Style AQ—\$120/pair

Originally designed for use while surface swimming or showering to prevent moisture from entering the ear canal, the AQ is also a superb sound attenuator. Available in a variety of colors and color combinations, with a Noise Reduction Rating of 27 dB.

Style 70—\$120/pair

This full shell swim plug features a sealed membrane spanning the sound bore to keep cold water and cold air out of the ear canal. **Recommended for use by active people when swimming, surfing, skiing, biking and jogging.** Not a noise plug, the style 70 also allows basic conversation while in the ear. Available in a variety of colors and color combinations.

Style 39—\$120/pair

Designed for hunting and other high-level impact noise environments, this full shell earpiece features a valve that closes in the presence of impact noise. This allows hunters to hear clearly until the weapon is fired and still have some hearing protection from the gunfire.
